Yash Enterprises

Aerolam Roll & Bubble Sheets

- Aerolam Roll and Bubble Sheets are insulation materials used in construction and packaging industries for thermal insulation, soundproofing, and protection.

Yash Enterprises

Aizar Gutter System

- Aizar Gutter Systems are designed for durability, efficient rainwater harvesting, and low-maintenance performance in heavy rains, suitable for residential to industrial roofs

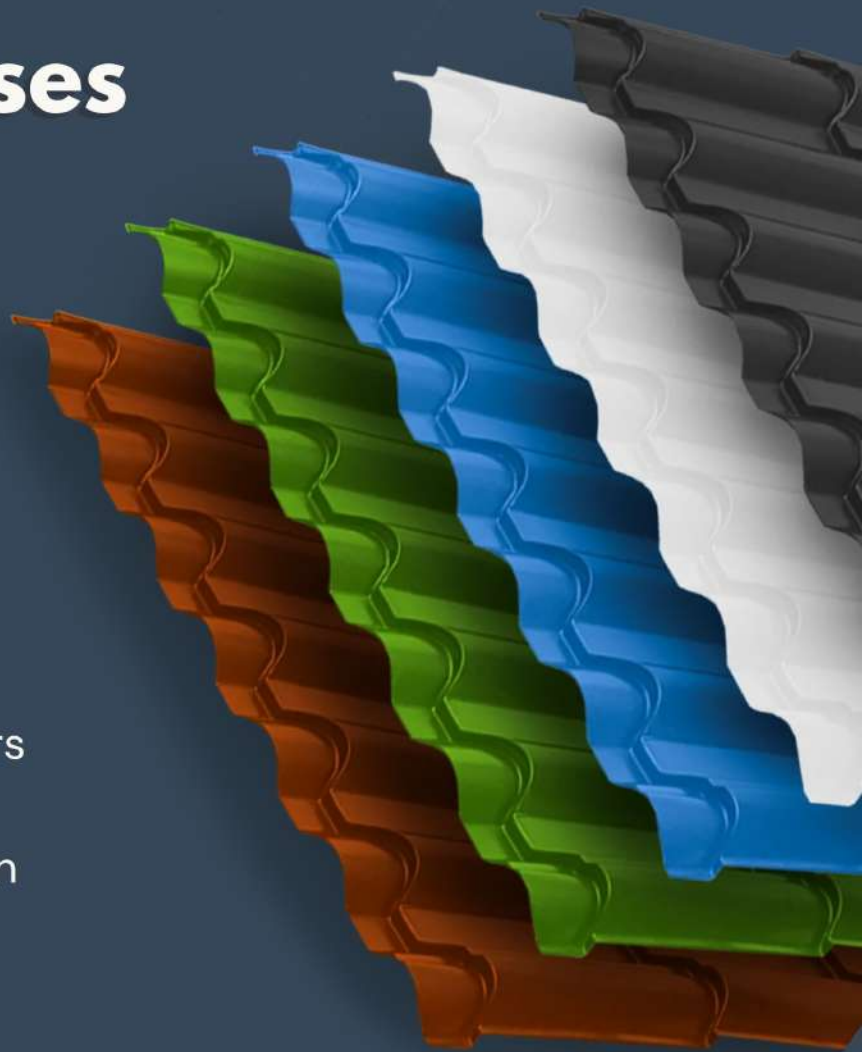

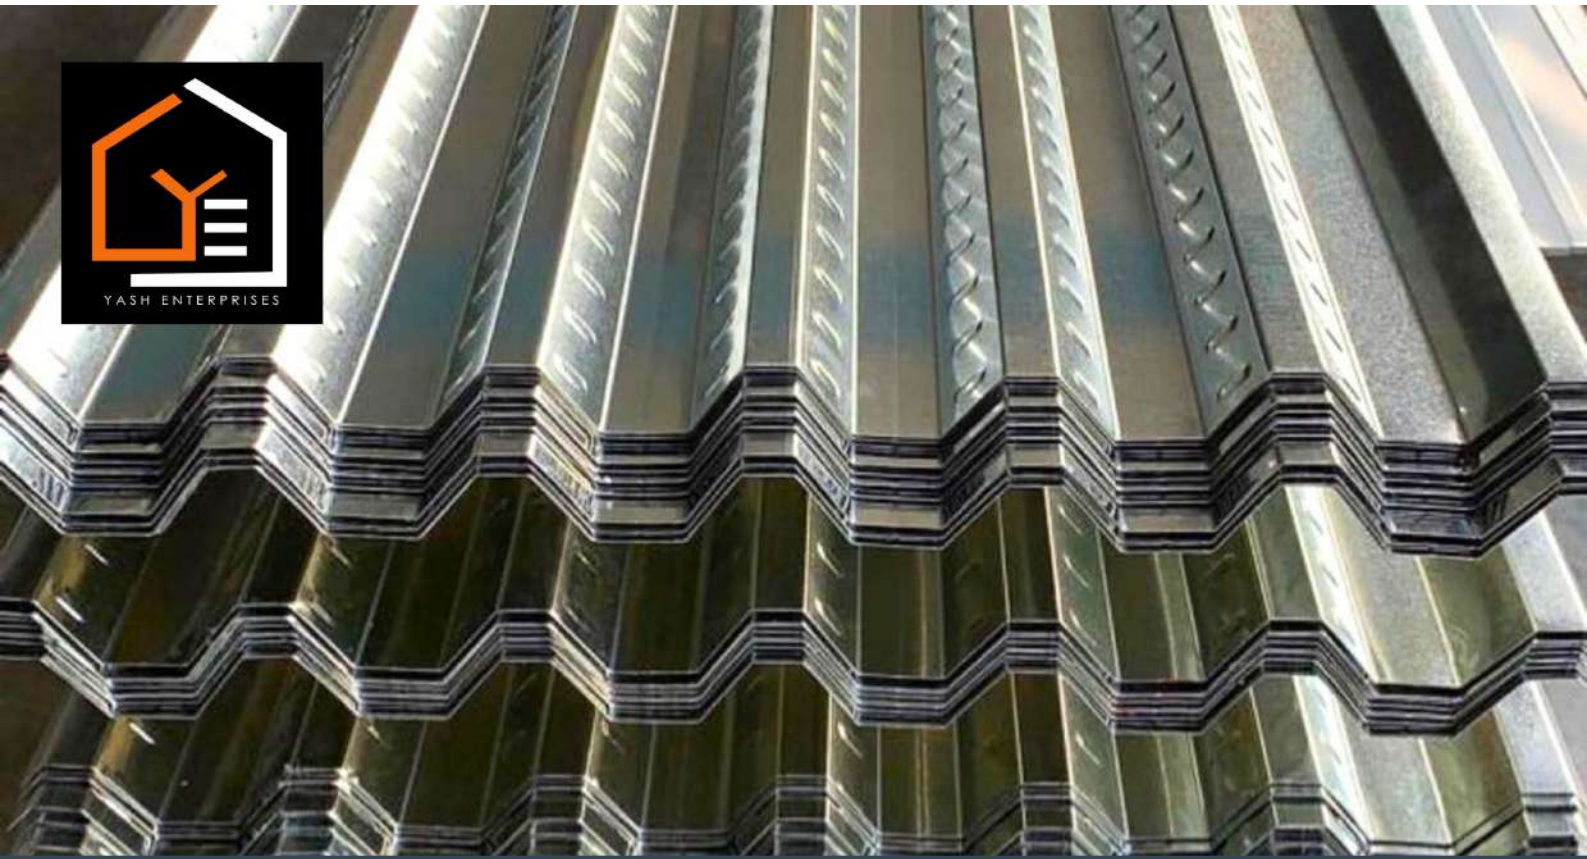

Yash Enterprises

Colour Coated Sheets

- Colour coated sheets are manufactured using galvanized steel, galvalume, or cold-rolled steel, and coated with protective layers of primer and paint to enhance durability, corrosion resistance, and aesthetics.

Yash Enterprises

Deck Sheets

- Deck sheet is a sheet of corrugated steel supported by joists or beams of steel. It is used for supporting a roof's concrete or insulating membrane. The design optimizes the steel's properties to produce a high strength-to-weight ratio that decreases material handling and retains durability.

Yash Enterprises

Eaves Board

An eaves board is a crucial part of a roof structure, installed along the edge of the roof where it meets the outer walls of the house. It plays both a structural and protective role.

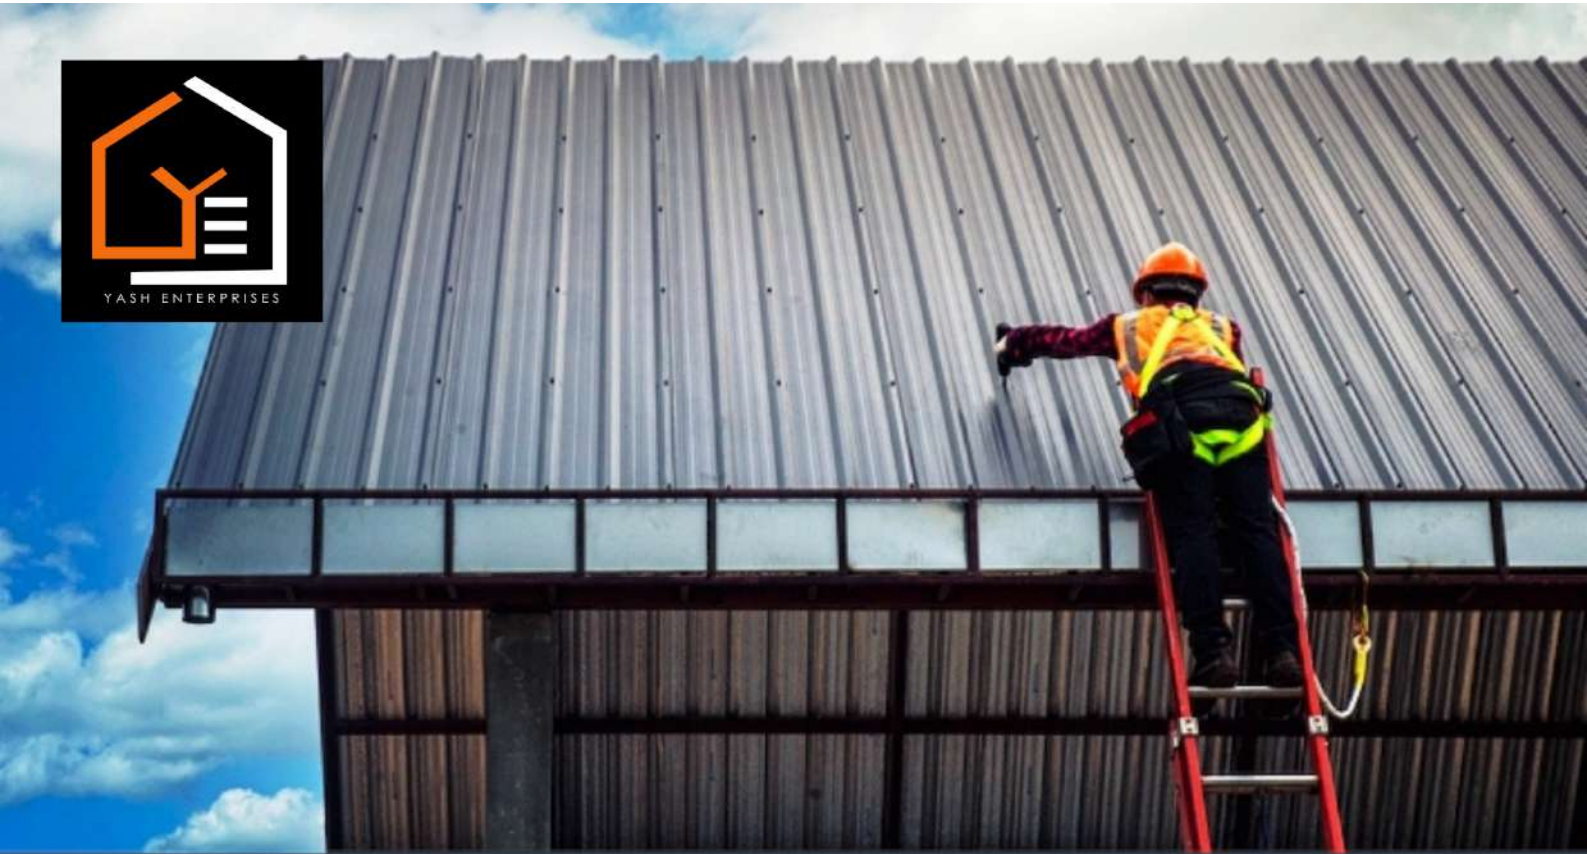

Yash Enterprises

FRP Sheets

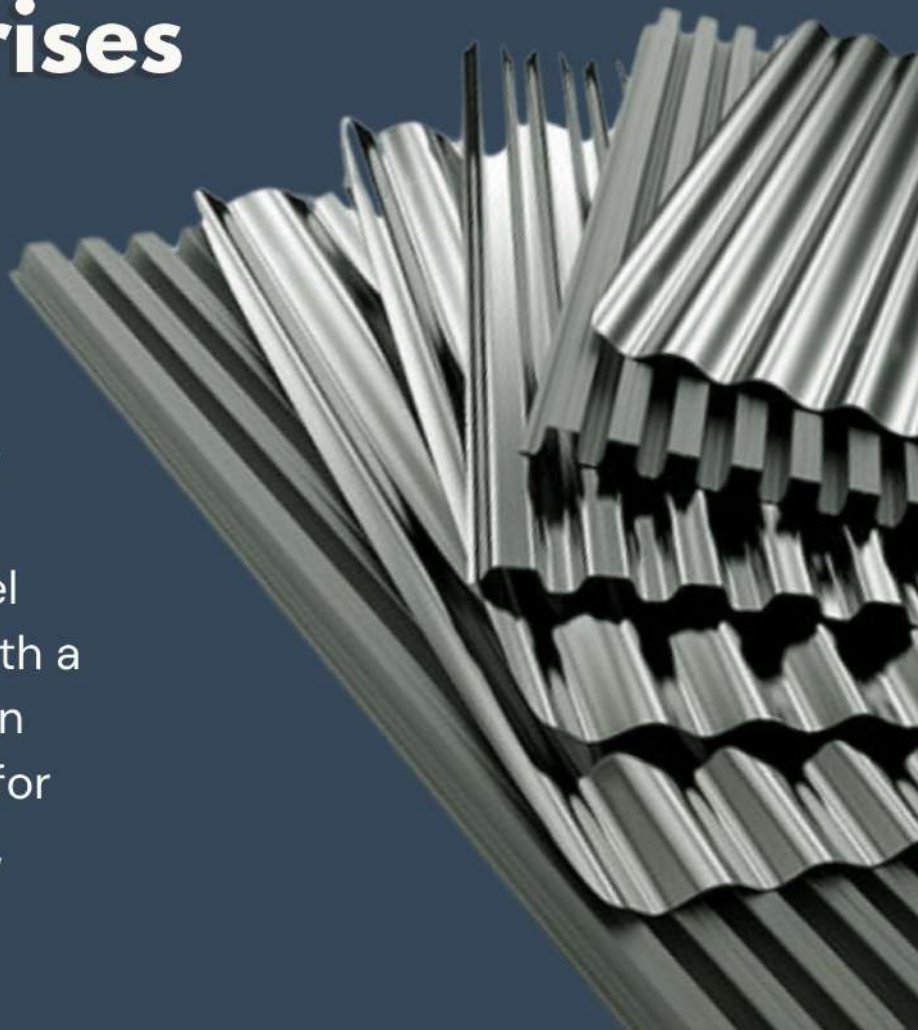

- FRP sheets are lightweight, durable panels made from fiberglass reinforced plastic, offering high strength, corrosion resistance, and low maintenance for industrial and construction applications.

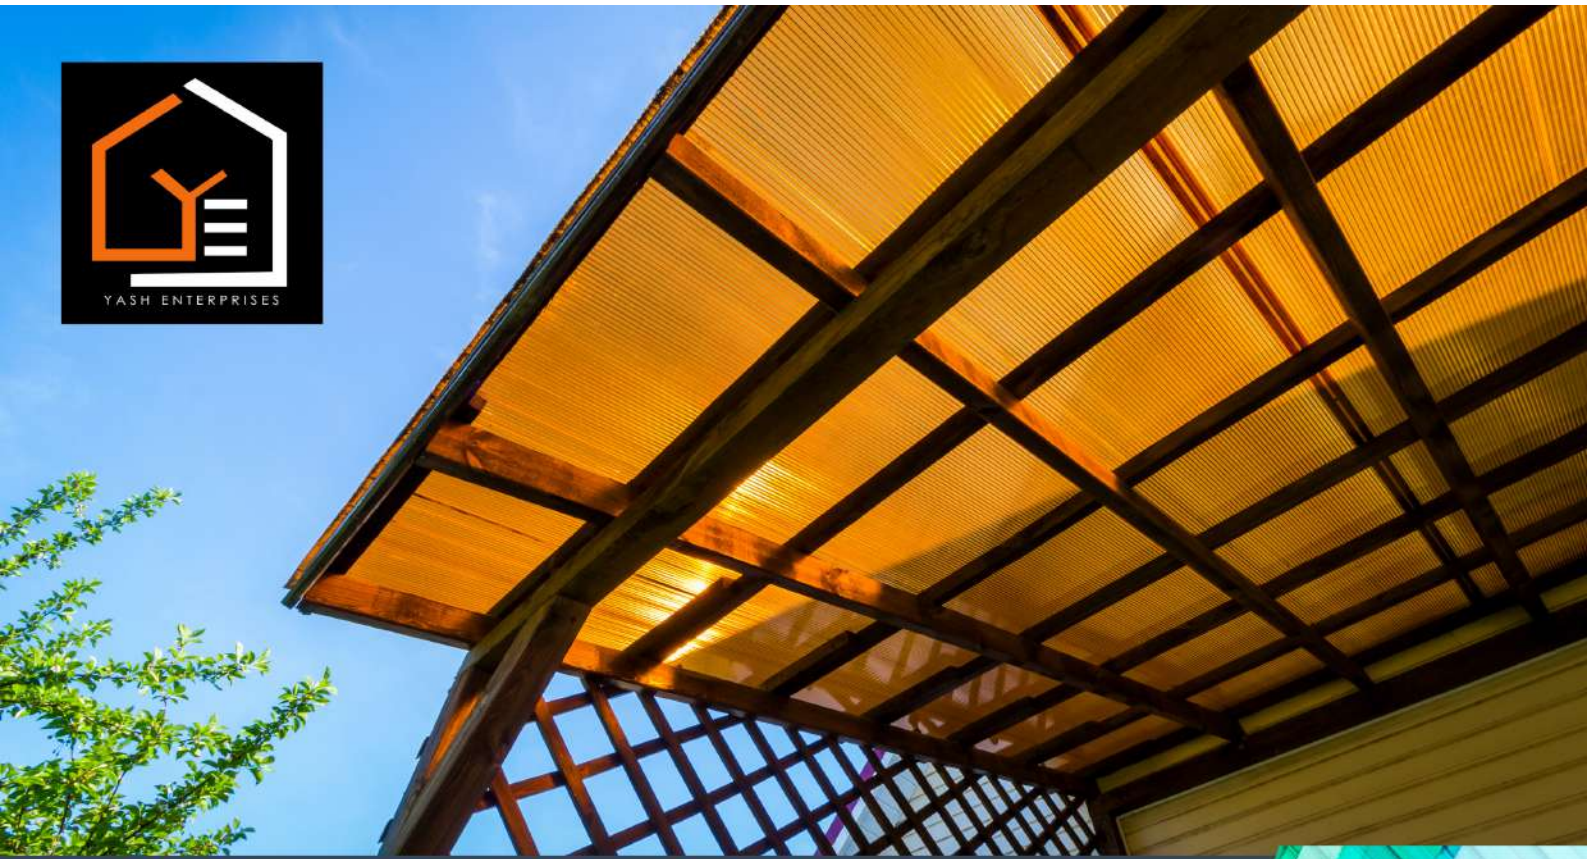

Yash Enterprises

GC Sheets

- GC sheets are a popular roofing and cladding material made from steel that has been coated with a layer of zinc for corrosion resistance, widely used for their durability, strength, and weather resistance

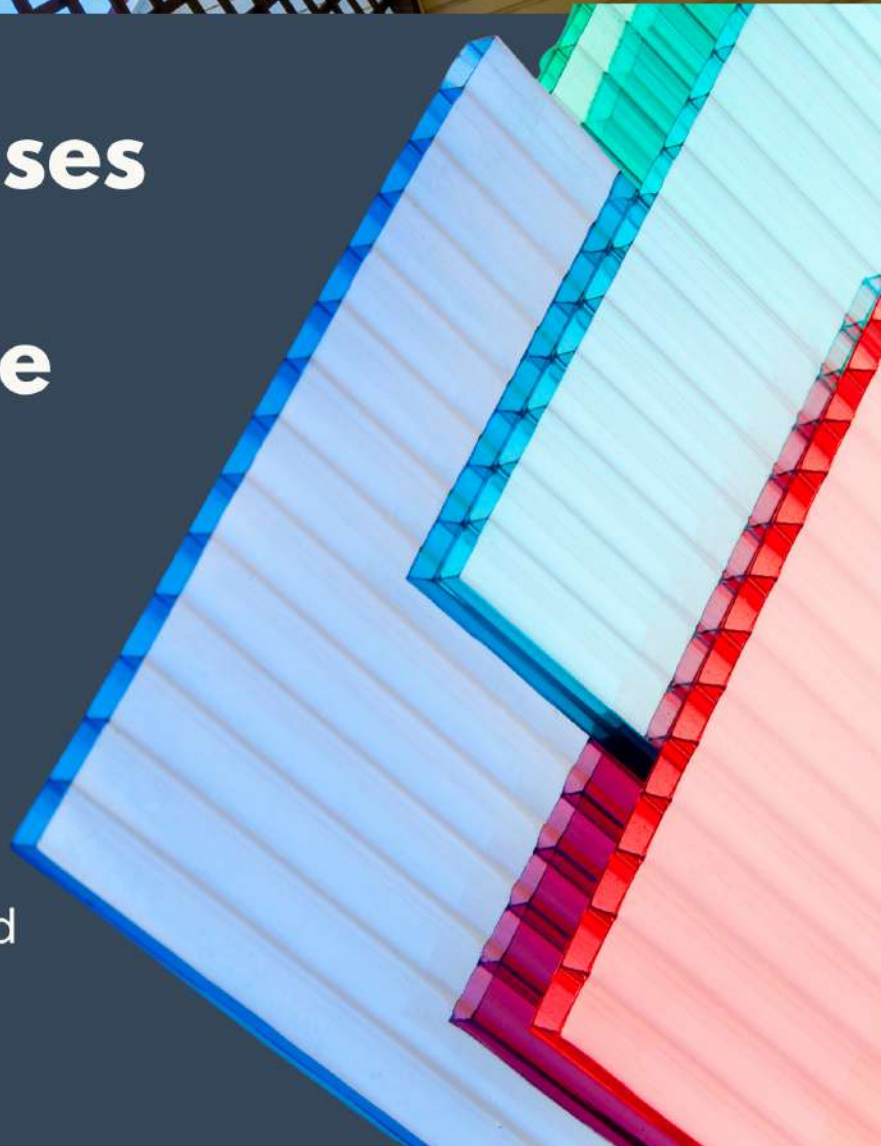

Yash Enterprises

Polycarbonate Sheets

Polycarbonate sheets are strong, lightweight, and versatile material used in a variety of applications due to their durability, clarity, and impact resistance.

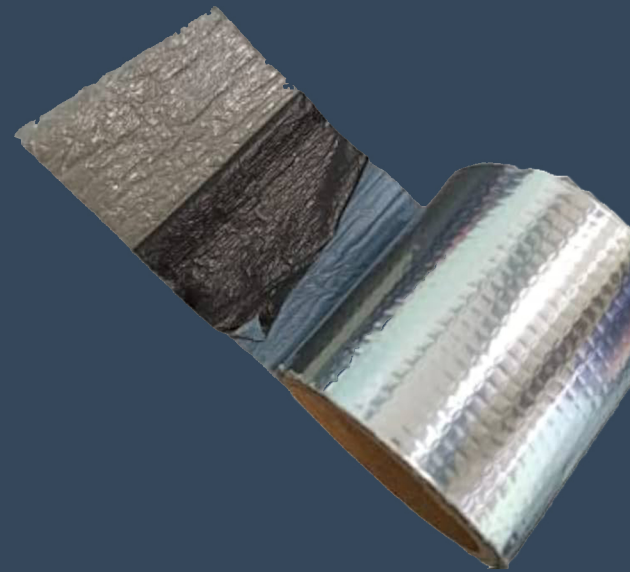

Yash Enterprises

Phondix Tapes

- Phondix Waterproofing Tape is a high-performance, self-adhesive sealing solution made with butyl rubber and an aluminum foil top layer. This tape is designed for instant,

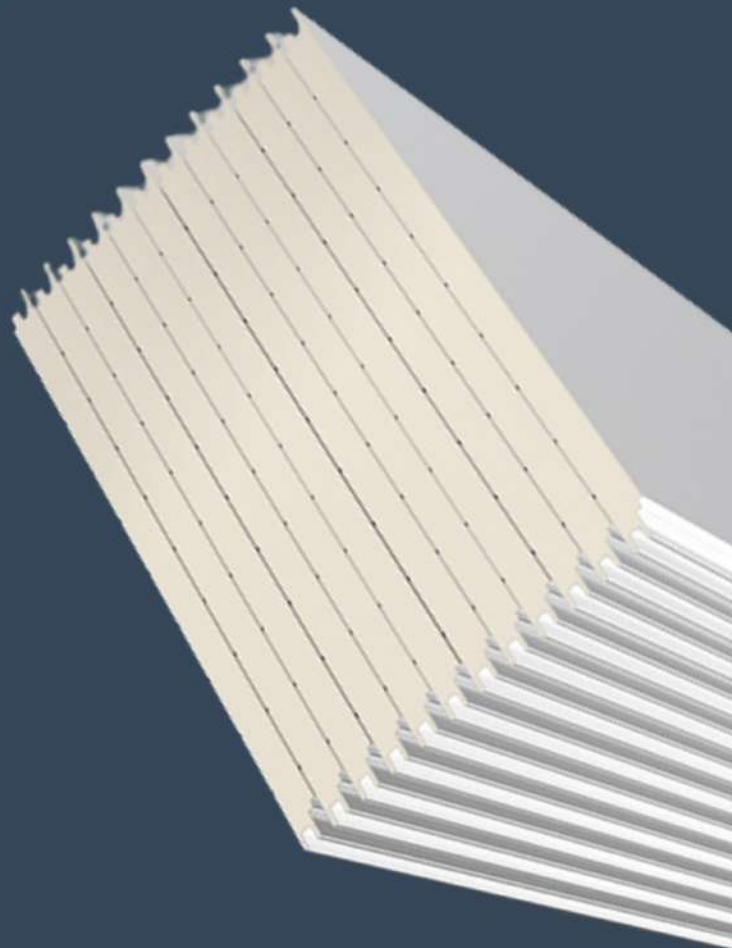

Yash Enterprises

PUF Panel Sheets And Wall Panels

- PUF panel sheets and wall panels are insulated building materials used for roofs and walls, offering excellent thermal insulation, durability, and ease of installation.

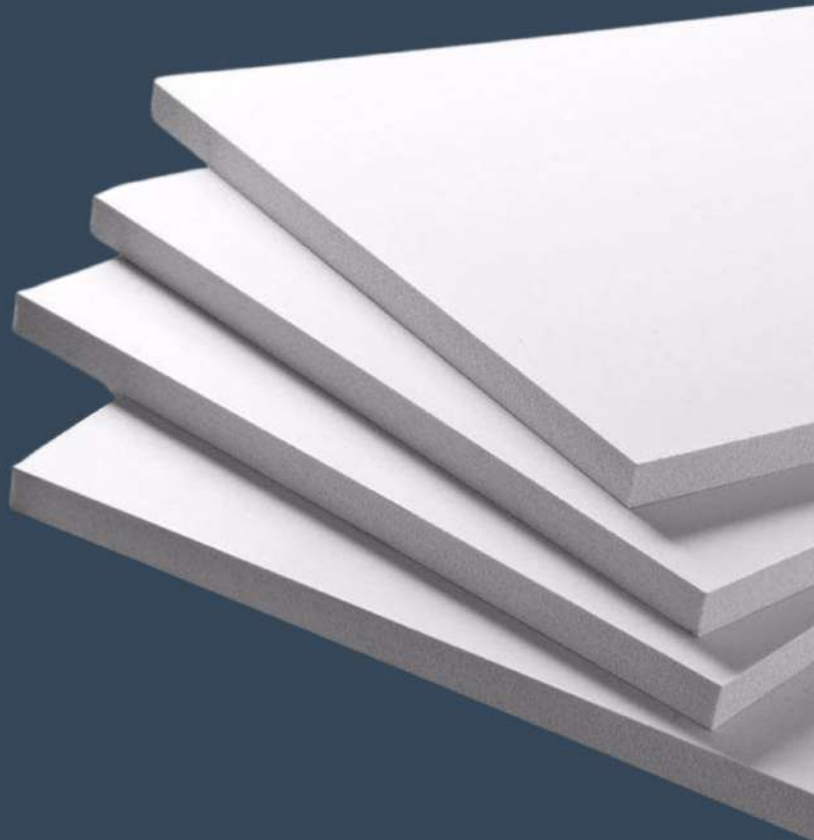

Yash Enterprises

PVC Board

- PVC boards are a versatile material with a wide range of applications due to their durability, water resistance, and ease of fabrication. They are used in construction, advertising, furniture, and various other industries.

Yash Enterprises

Hex Head Self Drilling Screws

- Hex head self-drilling screws combine the drilling and fastening functions. They are used for attaching metal to metal, metal to wood, and other materials in various applications like roofing.

Yash Enterprises

Spanish UPVC Sheets

- Spanish UPVC sheets are durable, lightweight roofing panels designed to mimic traditional Spanish tiles, offering UV resistance, insulation, and low maintenance.

Yash Enterprises

Ventilator And PC Base

- A PC base ventilator is a roof ventilation system for industrial and commercial buildings that combines a wind-driven ventilator with a durable, weather-resistant polycarbonate base that fits various roofing profiles.
